OIL, GAS & MINING

June 3, 1993

Daron Haddock, Permit Supervisor  
Division of Oil, Gas, and Mining  
355 West North Temple  
3 Triad Center, Suite 350  
Salt Lake City, Utah 84180-1203

Dear Mr. Haddock:

Attached are fourteen copies of map 3.2.1-3 and page 18/24 of Section 12 Vol. 5. These copies are for a permit change to our approved M&RP. The proposed changes are:

1. Install a 40' section of 30" culvert in ditch DD-9. This culvert is necessary as the adjacent hillside is sloughing into ditch DD-9 and every time we clean the ditch it aggravates this condition. This culvert will eliminate this situation. Page 18/24 shows that a 30" culvert will adequately handle the storm event.
2. A dirt berm has been added in ASCA area 17. This dirt berm will insure that the proper drainage will go to the drainage catch basin in special area 20.
3. The coal storage area boundary has been changed in the vicinity of the feeder hopper to more accurately depict actual conditions.

None of these changes involve any new disturbances. Increased reclamation costs for these changes are minimal (approx. \$450) and our excess bonding will adequately meet these costs.

If you need any additional information please call Keith Zobell.

Sincerely,

Ken Payne  
Vice Pres. & Gen. Manager
